Description
Gelato 73%

Gelato, also known as Larry Bird or Gelato #33, is a popular hybrid cannabis strain known for its potency and flavorful profile. It's a cross between Sunset Sherbet and Thin Mint Girl Scout Cookies.

THC content

Gelato strains can vary in their THC content. While the average is typically between 18-25%, some varieties, like Gelato #33, have been reported to reach over 30%.

It's important to distinguish between Gelato cannabis flowers and concentrates. Cannabis concentrates, like wax, rosin, and shatter, are significantly more potent than flower, with THC levels commonly ranging from 60-90%. A 73% THC concentration would be

typical for a Gelato cannabis concentrate, such as a vape cartridge or dab, not the raw flower itself.

Effects

Gelato is known for its balanced effects, offering both uplifting euphoria and relaxing body sensations. Users often report feeling:

- Euphoria and happiness: Gelato can induce a sense of well-being and contentment.
- Relaxation: The strain can help ease tension and promote a feeling of calm.
- Increased focus and creativity: Some users find Gelato helpful for tasks requiring concentration or artistic endeavors.
- Arousal: Some users have reported feeling aroused by Gelato.
- Sleepiness: At the end of the day, Gelato can help with relaxation and sleep.

Medical applications

Pain relief: The THC in Gelato may help reduce chronic pain, including arthritis, migraines, and muscle spasms.

- Stress and anxiety reduction: The calming effects of Gelato may help alleviate symptoms of stress, anxiety, and mood disorders.
- Appetite stimulation: Gelato may help stimulate appetite in individuals experiencing appetite loss.
- Insomnia relief: The relaxing properties of Gelato may help improve sleep quality and manage insomnia.

Flavor and aroma

Gelato's aroma and flavor profile are characterized by:

- Sweet, creamy, and fruity notes: Many users describe a taste reminiscent of berries, citrus, and sweet dessert-like flavors.
- Earthy and herbal undertones: There can also be hints of earthiness and herbal notes.
- Subtle minty hints: Some phenotypes may have a slight minty undertone.
