THC Content of 74%

Description
Jungle Pie 74%

Jungle Pie, a cannabis strain bred by Seed Junky Genetics and Jungle Boys, is a hybrid cross between Jungle Cake and Wedding Pie. The strain is characterized by a high THC content, often around the 74% mark you specified, along with a range of effects and flavors.

Effects and flavor

Jungle Pie is known for its balanced hybrid effects, initially inducing a physical relaxation that spreads throughout the body, followed by mental stimulation and hazy happiness. Some users describe the high as talkative, happy, and giggly.

The flavor and aroma profile is complex and appealing, featuring notes of vanilla, pepper, and nutty undertones. When smoked, it offers a smooth, creamy experience with hints of sweet vanilla cookie flavors and a spicy, nutty exhale.

Potential benefits

This strain is often chosen by medical marijuana patients to alleviate symptoms associated with anxiety, stress, and depression. Some users have also found it helpful for managing chronic pain, headaches, migraines, and glaucoma or eye pressure.
