Description
Strawberries N Cream 78%

"Strawberries n Cream" is a Sativa-dominant hybrid cannabis strain known for its sweet, fruity flavor profile and uplifting effects. It is often praised for its ability to induce euphoria, elevate mood, and inspire creativity without leading to excessive sedation

- Genetics:It's a cross between Strawberry Cough and The White.
- THC Content: Typically ranges from 18% to 22%, though some variations exist. For instance, one source mentions a West Coast Gold Vape Strawberry Cream with 65% THC, and another mentions a Live Resin Cartridge Strawberry Cream from Oleum at 86% THC.<
- Appearance: "Strawberries n Cream" produces dense, frosty buds that are light and dark green, with amber pistils and crystal-covered leaves.
- Aroma: The strain is famous for its sweet, fruity aroma, reminiscent of sugary

wildberry pie, with hints of fresh earth, cinnamon, allspice, and cloves.

- Flavor: Expect a creamy and sweet taste with notes of fresh summer strawberries on the inhale and a hint of spiciness on the exhale.
- Effects: Users often report feeling energetic, talkative, and creative, making it suitable for various activities and social settings.
- Medical Use: It may offer potential benefits for individuals dealing with issues like stress, anxiety, chronic pain, headaches or migraines, nausea or appetite loss, and chronic fatigue.
- Dominant Terpenes: The strain's effects and flavor are heavily influenced by the terpenes caryophyllene, myrcene, and limonene.
- Price: "Strawberries n Cream" is generally considered a moderately priced strain, with an average cost ranging from $12 to $16 per gram.
